Summary

BCA graduate and aspiring Full-Stack Developer with hands-on experience in MERN stack, Angular, Laravel, and Python. Skilled in building responsive web applications, developing RESTful APIs, and working with MongoDB and MySQL databases. Comfortable with frontend frameworks like React and Angular, and backend technologies like Node.js and Laravel. Passionate about learning new technologies, building real-world projects, and growing as a software developer.

Projects

Personal Portfolio Website

- Developed a fully responsive personal portfolio using HTML, CSS, and JavaScript.
- Added sections for projects, skills, and contact details with smooth scrolling effects.
- Focused on clean UI, simple animations, and fast loading performance.

Employee Management System (Angular Full Stack)

- Developed a full-stack employee management web application using Angular for the frontend and RESTful APIs for the backend.
- Implemented secure user authentication and authorization using JWT.
- Built CRUD features to add, view, update, and delete employee records.
- Designed responsive and user-friendly UI using Angular and Bootstrap / Angular Material.
- Integrated frontend with backend APIs using Angular HTTP services.
- Implemented role-based access for Admin and User modules.
- Tested APIs using Postman and managed source code with Git and GitHub.

Restaurant Full-Stack Application (MERN STACK)

- Created a restaurant web app using HTML, CSS, JavaScript, React, Node.js, Express, and MongoDB.
- Built frontend UI for menu display, cart features, and order flow.
- Developed backend APIs for user authentication, menu management, and order handling.
- Implemented full-stack functionality with proper routing and database connectivity.

Job Portal Management System (Laravel + MySQL)

- Developed a full-stack job portal web application using Laravel and MySQL.
- Implemented user, company, and admin roles with authentication and authorization.
- Built CRUD functionalities for job postings, user profiles, and job applications.
- Created RESTful endpoints and used Laravel controllers, models, and migrations.
- Designed responsive UI using Bootstrap and Blade templates.
- Used middleware for role-based access control and route protection.
- Tested APIs using Postman and maintained code using Git and GitHub.

Python Service Booking System (Pure Python Stack)

- Developed a full-stack web application using Python for backend and server-rendered frontend.
- Implemented user authentication and role-based access using Python frameworks.
- Built modules for service management and booking with full CRUD operations.
- Used Python OOP concepts, file handling, and database operations for data management.
- Followed MVC/MVT architecture and maintained source code using Git and GitHub.

Technical Skills

Languages: JavaScript, HTML, CSS, Typescript, Python

Frontend: React.js, Angular, Tailwind CSS, CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, Laravel

Database: MongoDB, MySQL

Authentication & APIs: JWT, Axios, REST APIs

Tools: JWT, Axios, REST APIs

Python Concepts:

Variables, Loops, Functions

Lists, Dictionaries, Tuples

File Handling

Basic OOP (Classes, Objects)

CMS & Tools: Wordpress, Figma

Version Control: Git, GitHub

Education

St. Thomas College, Palai, Bachelor of Computer Applications (BCA)

June 2022 – March 2025

Certification

- Frontend Introduction
- <https://www.hackerrank.com/certificates/fd5a69df905b>
- 1 month PYTHON internship at LCC, Kochi
- 6 months MEARN STACK intern at LUMINAR, Kochi

Languages Known

- English
- Malayalam
